STEPS

TO SAFETY

www.koller.co.uk

Safety Without Compromise

Koller Engineering Ltd (Safety Restraint Engineers) was established in 1980 by Max Koller. Continuing to be run by the family, the company specialises in the design and manufacture of wheelchair accessible vehicle products.

A leading company in this specialised market, we are recognised for our attention to safety, quality and customer satisfaction. We are fully ISO 9001:2008 compliant.

STEP 1

For a small additional cost, a 3-point (upper anchorage) belt can be added at any time.

GENESIS 85

From £99.99 – GENESIS 85 combined wheelchair restraint & passenger harness

Using tried and tested parts along with Koller's engineering skills we have come up with a safe way of securing passengers and wheelchairs that won't break the bank.

THE GENESIS 85 ADVANTAGES:

- Crash tested to ISO 10542 for wheelchairs up to 85kg PLUS occupant
- Static front straps with J hooks for easier attachment
- Combined rear straps with Koller designed over-centre buckles, J hooks and static lap and diagonal seatbelts
- Colour-coded lap and diagonal seatbelts for ease of use – black for lap and blue for diagonal
- The universal TITUS harness provides maximum passenger comfort and safety, and is also FUTURE-PROOF – a 3-point (upper anchorage) belt can be added at any time – just clip the 3-point belt into the tongue provided as standard on the harness
- Can be fitted on either shoulder for customer comfort
- Easily adjusted lap and diagonal seatbelt
- Complete system to secure 1 wheelchair and passenger £99.99
- Koller engineered for safety

STEP 2

For a small additional cost, a 3-point (upper anchorage) belt can be added at any time.

EXCEL120

From £135 – EXCEL 120 combined wheelchair restraint & passenger harness

↘ The Koller EXCEL 120 combined – the first combined restraint of its type on the market. It has been continually improved to provide the most durable and space saving restraint in a cost-effective package.

THE EXCEL 120 COMBINED ADVANTAGES:

- Crash tested to ISO 10542 for wheelchairs up to 120kg PLUS occupant
- Rear tie-downs use EXCEL compact over-centre buckles for adjustment ensuring shorter belts can be achieved compared to conventional buckles
- The universal TITUS harness provides maximum passenger comfort and safety, and is also FUTURE-PROOF – a 3-point (upper anchorage) belt can be added at any time – just clip the 3-point belt into the tongue provided as standard on the harness
- Durable and cost effective all-in-one wheelchair and passenger restraint system
- Choice of karabiner or buckle & tongue fittings
- Fixed length front straps for easy fitting
- The TITUS passenger harness is simple to fit – pull the belts from the reactor housing, place around the passenger and clip in place
- Colour-coded belts on TITUS harness for easy identification: black for lap belt, blue for shoulder and 3-point belts
- Covers on TITUS retractors AND stalk buckle for durability and protection
- Black tie-down webbing ensures belts look good for longer
- Wide webbing used throughout for strength and stability
- Tried and tested components ensure great durability and function
- Compatible with Koller low profile and surface rails
- Koller engineered for safety

STEP 3

For a small additional cost, a 3-point (upper anchorage) belt can be added at any time.

NEXXUS 200

From £250 – NEXXUS 200 combined wheelchair restraint & passenger harness

↘ NEXXUS 200 – the world's strongest combined wheelchair and passenger restraint. The NEXXUS system will meet your most demanding needs and ensure that almost any wheelchair and passenger can travel in complete safety.

THE NEXXUS 200 ADVANTAGES:

- The world's only combined wheelchair tie-down and passenger harness system crash tested to the ISO 10542 standard for wheelchairs up to 200kg
- EXCEL compact adjustable tie-down straps
- Koller designed karabiners on all wheelchair tie-down straps for maximum strength and safety
- Specifically designed rear mini lockable rail clips with double plunger system for added strength & security
- Future-proof universal TITUS passenger harness - can be used as a 2-point harness or converted at any time to a 3-point harness
- Colour-coded belts on TITUS harness for easy identification: black for lap belt, blue for shoulder and 3-point belts
- Covers on TITUS retractors AND stalk buckle for durability and protection
- The TITUS Passenger Harness is simplicity to fit - pull the belts from the retractor housing, place around the passenger and clip in place
- Tried and tested components ensure great durability and function
- Black tie-down webbing ensures belts look good for longer
- Wide tie-down webbing throughout for strength and stability
- Colour-coded key components for easy identification
- Compatible with Koller low profile and surface rails
- Koller engineered for safety
